

## **Ridiculous anti-Japan activity of Korea**

**2019.9.9 Seiji Tanabe**

**Korea originally annoys it as ever for Japan which is the first supporter of the own country.**

**I want to send this widely for the world. It's because of that there will be many countries which do not know this in U. S. & Europe and other countries, on the other side, Korea send a false rumor which look down on Japan to the world by so-called "tale diplomacy".**

**We can follow Japanese dignity by having them understand the truth and, on the other hand, think that Korea can open the good future.**

**In fact, this state does not bother Japan at all. However, for Korea, it will be few opportunities whether or not Korea can become the maturity country in a true meaning.**

**Therefore I want to approach essence of the abnormal behavior of Korea while at first enumerating the present conditions and problems, and arranging it.**

**The following**

### **1 Support (mainly finance) of Japan**

**Japan supported 800 million dollars (2.28 times of the annual budget of Korea) and 5,300 million dollars (the property which I abandoned in Korea), 6,100 million dollars or more in total in Japan-ROK Basic Relations Treaty of 1965. In addition to it, I give the transfer of industry technology or finance support at the time of the weak won to Korea afterwards.**

**Of these, I notify the finance support that it is easy to understand and want to show the concrete instance as follows.**

**① February, 1997**

**It begins for HANBO iron manufacture bankruptcy, and there is national trust downgrading from U.S. Moody's, and a won slumps. Japan became the first support country then.**

**(Support contents)**

**Japan: Free 10 billion dollars, The World Bank (the Japanese fund grant second place): 10 billion dollars, Asian Development Bank (the Japanese fund grant first place): 4 billion dollars.**

**② 2008**

**The won soared with 900 won to the dollar till then. It fell to 1,000 won in March when the financial crisis that it was global began in. Korea watched it calmly when it would be high price adjustment, but slumped to 1,500 won in November.**

**(Support contents)**

**Japan raised the upper limit of the currency swap to 30 billion dollars and supported it.**

**③ 2011**

**As for the economy of Korea, slow recovery continued in early 2011. However, a debt crisis in Europe recurred from the middle part, and the capital withdrawal from the beginning Asian countries in Korea was carried out, and a Korean won made a sudden drop with it.**

**(Support contents)**

**Japan raised the upper limit of the currency swap to 70 billion dollars and supported it.**

## **2 Korean essential defect by my personal opinion**

**① Tell a lie**

- ① Korea still places a false commandeering mechanic photograph in the textbook
- ② Korea irradiates a radar for a Japanese plane and explains it when the plane threatened it by low flying
- ③ Korea misrepresented it as follows. "Japan took a charity dame"
- ④ Korea insisted on the falsehood as follows. Because "Japan did not accept discussion, this Japan-Korea opposition occurred"

a) About the judgment of Korean Chancery, Japan called for Korea for an argument. However, Korea continued completely refusing a request of Japan.

b) Japan required an argument about the management of 40 tons of hydrogen fluoride missing people. However, Korea refuses it during three years.

c) Korea said that , after the United States of America agreed, it decided destruction of GSOMIA. However, the United States of America says "No".

d) The inundation of their ship happened by the next reason near the United States of America coast. "Because Japanese ship avoided Korean ship." But it does not make a real excuse too much.

## ② Breaking a promise

○1965 Japan-ROK Basic Relations Treaty

○1995 Agreement by the woman fund of Asia

○2015 Issue of Ianhu-irreversible agreement by both Bak and Abe leaders)

- ③ Bluff(When they are troubled, they open a shoulder)
- ④ Can not listen to the opinion of the person  
(Self-righteousness, arrogance:According to ①~③ mentioned above)
- ⑤ Perfect irresponsibility (The dam which a Korean company was building in Laos collapsed, but Korea Korea is not going to accept the responsibility.)
- ⑥ Retroactivity characteristics of the responsibility (The thought (a bad meaning) of HAN is the biggest obstacle, For example, because Buddha of the stolen article is the thing which Wako stole 800 years ago which does not need to return, etc. There is usually the principle that the modern laws and ordinances give "in fact having" and "free business" big importance generally and the violation is removed by the wrongful conduct.)

### 3 Anti-Japan of these days (Betrayal)

- ① examples about the destruction such as treaties

Japan-ROK Basic Relations Treaty (1965): Destruction, the agreement (1995) by the woman fund of Asia: Repeat it after the enforcement end; an issue of charity dame irreversible agreement (2015) by both Boku Abe leaders: Destruction

- ② Sun flag rejection

- ③ Image of the factory worker whom I commandeered, or image of the girl (both are based on the lie) ⇒ They Increase.

Protection system by the local autonomy regulations.

- ④ Radar irradiation for the Japanese patrol aircraft

**⑤ Interference of the Tokyo Olympic Games by the radiation dose agitation**

**(Accurate radiation dose)**

**Tokyo average:  $0.039 \mu\text{S/h}$  《 1 year:  $0.34\text{mS}$  》**

**Seoul average:  $0.118 \mu\text{S/h}$  《 1 year:  $1.24\text{mS}$  》**

**Fact: Seoul is releasing a radiation dose of 3.6 times of Tokyo**

**⑥ Insult for His Majesty the Emperor**

**⑦ Anti-Japan laws and ordinance**

**[Reference]**

**① I converted 100 million yen of 1965 with current 412 million yen. The source: [yaruzou.net/hprice/hprice-calc.ht](http://yaruzou.net/hprice/hprice-calc.ht)**

**② I calculated the rate of dollar - Japanese yen for 1 dollar = 360 yen.**

**③ A breakdown of amount of direct support 800 million dollars of 1965: Free 300. payment 200. private loan 300( It was supported of 800 million dollars in total). The property which was abandoned in Korea: 5,300 million dollars (test calculation of Government)**
